Featured pictures in Wikipedia

This page highlights the finest images on Wikipedia. The [featured picture criteria](#) explains that featured pictures must be [freely licensed](#) or in the [public domain](#), must be of a high technical quality, and must add significantly to at least one article on Wikipedia. There are currently **8,797** featured pictures, and they are categorized below by the topic they represent. All featured pictures are also [available in a category](#).

If you wish to add a specific image to this page, please nominate it at [Wikipedia:Featured picture candidates](#).

One or more featured pictures are chosen as the [picture of the day](#) (POTD). You can include a box displaying the current POTD anywhere (e.g. your user page) by adding the text `{{pic of the day}}` or `{{POTD}}` where you want the picture to be shown. If you have uploaded a picture that, though not featured, is good, you could list it at the [Random Picture of the day](#)

Featured pictures from all Wikimedia projects can be browsed [by subject](#) or [by country](#) on [Wikimedia Commons](#).
