

List of Wikipedias

This page contains information about all **363 languages** for which official Wikipedias have been created under the auspices of the Wikimedia Foundation. The table below, however, excludes 16 Wikipedias that were closed and 11 of them were moved to the Wikimedia Incubator for further development, leaving a current total of **347** active Wikipedias. Content in other languages is being developed at the Wikimedia Incubator; languages which meet certain criteria can get their own wikis.

The table entries are ordered by current article count. Each entry gives the language name in English (linked to the English Wikipedia article for the language); its "local name" (i.e. in the language itself); the language code used in the wiki's URL address and in interwiki links to it (linked to the local Main Page); and statistics on articles, edits, administrators, users, active users, and images (each linked to an appropriate local special page).

To start a Wikipedia in a new language, please see our language proposal policy and the Incubator manual. **Note: Just adding a link here does not create a new Wikipedia, nor does it serve to request that one be created.**

If a wiki becomes active and is not listed here, please post a notice on this article's talk page, including a link to *all* the relevant Wikipedia pages, and help promote the effort by announcing it on the Wikipedia-L mailing list, and at Wikimedia News.

The tables here are maintained automatically based on statistics collected by a bot four times a day, so **it is not necessary to "manually" update the table**. (The way this is being done makes that impossible, anyway.) If something is wrong with an entry other than simply having slightly outdated statistics, post about it on the talk page.

More lists of Wikipedias by various criteria :

- List of Wikipedias by article count, users, file count and depth and its source (updated every 3 hours, see also: wikistats.wmcloud.org (https://wikistats.wmcloud.org/display.php?t=wp) for another list)
- List of Wikipedias by edits per article and depth (both updated every 6 hours)
- List of Wikipedias by language group and family (both updated every 6 hours) and language families as a tree (not just Wikipedias)
- List of Wikipedias by country (updated manually)
- List of Wikipedias by speakers per article (updated every 6 hours)
- List of Wikipedias by sample of articles and expanded sample of articles (both updated monthly)
- List of Wikipedias by featured and good articles (both updated manually)
- List of Wikipedias by creation date (incomplete)
- List of Wikipedias in multiple writing systems
- List of Wikipedias having local media files and zero local media files (both updated manually)
- List of Wikipedia milestones or en:Wikipedia:Milestone statistics (tracking of major article-count milestones)
- List of largest wikis (not just Wikimedia wikis)
- Wikimedia News (announcements and tracking of milestones for all Wikimedia projects)
- Tell us about your Wikipedia

Notes

- The "**All pages**" column refers to the number of pages in *all* namespaces, including both **articles** (the official article count of each wiki) and **non-articles** (user pages, images, talk pages, "project" pages, categories, and templates).
- "**Active Users**" are registered users who have made at least one edit in the last thirty days.
- "**Files**" is the number of locally uploaded files. Note that some large Wikipedias do not use local images or other media files and rely on Commons completely, so the value "0" is not a glitch (see also List of Wikipedias having zero local media files).

All Wikipedias ordered by number of articles

The languages listed here are Wikipedias that have been created as separate subdomains of wikipedia.org, ordered by number of articles. The table can also be sorted by other columns. It excludes closed Wikipedias.

The source of the data is commons:Data:Wikipedia statistics/data.tab. Historical data of this table dating back to 2007 can be found in the history of that table (https://meta.wikimedia.org/w/index.php?title=List_of_Wikipedias/Table&action=history) or, after 15 October 2022, in the history of the current source of the data (https://commons.wikimedia.org/w/index.php?title=Data:Wikipedia_statistics/data.tab&action=history). Rounded historical data of this table dating back to 2001 can be found in the stats.wikimedia.org (archive) (https://web.archive.org/web/20250414114158/https://stats.wikimedia.org/EN/TablesArticlesTotal).

These statistics are updated several times a day. You might need to purge the cache to see the latest numbers.

Other Wikipedias

Not yet created

Please visit the **Wikimedia Incubator** for new language versions (known as "tests") that may become stand-alone wikis in the future. See the [Incubator Manual](#) and [FAQ](#) for more information.

- [Manually maintained list of test Wikipedias in the Incubator](#)
- [Search for a wiki in over 400 different languages \(includes normal Wikipedias and test Wikipedias\)](#)

Closed and read-only

These Wikipedias are closed and in read-only status. Existing users can still log in and their user preferences are still effective, but they cannot edit any pages. Editable copies of these Wikipedias can be found in the Incubator; for example, the page [cho:Chahta](#) at the closed Choctaw Wikipedia can be found (and edited) at [incubator:Wp/cho/Chahta](#).

1. [aa](#): – The [Afar Wikipedia](#) was [closed on 10 May 2008](#). It is now found at [incubator:Wp/aa](#).
2. [ak](#): – The [Akan Wikipedia](#) was [closed on 1 April 2023](#). It should be noted that Akan is now considered a family of languages, so the [ak.wikipedia](#) domain has been split into two separate projects (and potentially more): one for [Twi](#) at [tw](#):, and another for [Fante](#) at [fat](#)..
3. [cho](#): – The [Choctaw Wikipedia](#) was [closed on 3 July 2007](#), following a community vote. It is now found at [incubator:Wp/cho](#).
4. [cr](#): – The [Cree Wikipedia](#) was [closed on 2 December 2025](#). Due to dubious quality of pages, pages on the Cree Wikipedia were not imported into Incubator; users who are familiar with speaking Cree are free to [re-start such a project](#) from scratch.
5. [ho](#): – The [Hiri Motu Wikipedia](#) was [closed on 9 July 2007](#). It is now found at [incubator:Wp/ho](#).
6. [hz](#): – The [Herero Wikipedia](#) was [closed on 24 July 2007](#). The wiki has been emptied and locked, but the original user pages still exist. It is now re-incubated at [incubator:Wp/hz](#).
7. [ii](#): – The [Sichuan Yi Wikipedia](#) was [closed on 29 July 2007](#). It is now found at [incubator:Wp/ii](#).
8. [kj](#): – The [Kwanyama Wikipedia](#) was [closed on 10 July 2007](#). It is now found at [incubator:Wp/kj](#).
9. [kl](#): – The [Kalaallisut/Greenlandic Wikipedia](#) was [closed on 2 December 2025](#). Due to dubious quality of pages, pages on the Kalaallisut/Greenlandic Wikipedia were not imported into Incubator; users who are familiar with speaking Kalaallisut are free to [re-start such a project](#) from scratch.
10. [kr](#): – The [Kanuri Wikipedia](#) was [closed on 3 May 2007](#), following a community vote. The reason was the absence of both content and community. As Kanuri is considered as a macrolanguage, where member language codes of the macro has lack of mutual intelligibility, a [Central Kanuri \(knc\) Wikipedia](#) was re-launched in 2025.
11. [lrc](#): – The [Northern Luri Wikipedia](#) was [closed on 14 January 2021](#). As almost all of the former contents were confirmed not written in proper Luri, they were not imported back into the Incubator. Users who speak the language are encouraged to [re-start a test project](#).
12. [mh](#): – The [Marshallese Wikipedia](#) was [closed on 4 May 2008](#). It is now found at [incubator:Wp/mh](#).
13. [mus](#): – The [Muscogee Wikipedia](#) was [closed on 10 July 2007](#). It is now found at [incubator:Wp/mus](#).
14. [na](#): – The [Nauruan Wikipedia](#) was [closed on 1 May 2023](#). The contents of nawiki were imported into [Incubator Wp/na](#), but deleted in 2025 due to a discussion that doubt the quality of imported-in contents; users who are familiar with speaking Nauruan are free to [re-start such a project](#) from scratch.
15. [ng](#): – The [Ndonga Wikipedia](#) was [closed on 10 January 2010](#). It is now found at [incubator:Wp/ng](#).
16. [pih](#): – The [Pitkern Wikipedia](#) was [closed on 19 March 2025](#). Due to lack of useful contents, pages on pihwiki were not imported into Incubator; users who are familiar with speaking Pitkern are free to [re-start such a project](#) from scratch.

See also our [Special:SiteMatrix](#), where the closed Wikipedias are crossed out (and the red links indicate wikis that have never existed). There is also a configuration file listing [all closed Wikimedia projects](#) (<https://noc.wikimedia.org/conf/highlight.php?file=dblists/closed.dblist>).

Deleted but hosted elsewhere

These Wikipedias are no longer hosted by Wikimedia. They have been moved to other hosts.

1. [tlh](#) – The [Klingon Wikipedia](#) was permanently locked in August 2005, and was moved to Wikia (Fandom) as the [Klingon Wiki](#). For details, see the [history of the Klingon Wikipedia](#).
2. [ru-sib](#) – The [Siberian Wikipedia](#) was [deleted in 2007](#) after it became apparent that the creation of the wiki in 2006 was based on a hoax. The wiki's content was moved to the [sibvolgota](#) (<http://yauzaforum.ru/upliner/sibvolgota/>) ([archive link \(https://web.archive.org/web/20121008014455/http://yauzaforum.ru/upliner/sibvolgota/index.php?title=%D0%93%D0%BE%D0%BB%D0%BE%D0%B2%D0%BD%D0%B0_%D1%81%D1%82%D0%BE%D1%80%D0%BE%D0%BD%D0%BA%D0%B0\)](https://web.archive.org/web/20121008014455/http://yauzaforum.ru/upliner/sibvolgota/index.php?title=%D0%93%D0%BE%D0%BB%D0%BE%D0%B2%D0%BD%D0%B0_%D1%81%D1%82%D0%BE%D1%80%D0%BE%D0%BD%D0%BA%D0%B0)).
3. [mo](#): – The [Moldovan Wikipedia](#) in the [Moldovan Cyrillic alphabet](#) was [deleted in November 2017](#), a decade after being [closed](#). It is now hosted by Fandom as [Википедия](#) (https://wpmo.fandom.com/mo/wiki/Пажина_принципалэ). The [mo](#): interlanguage prefix now points to the [Romanian Wikipedia](#).

This list previously included the [Toki Pona Wikipedia](#) ([tok](#):), which was locked in 2004, [officially closed in 2008](#), and [deleted in 2010](#) due to the lack of a valid ISO language code. After moving to Wikicities (later Wikia, then [Fandom](#)) and thence to <https://wikipesija.org>, it returned to Wikimedia servers in [2025](#) after receiving an ISO code.

Nonstandard language codes

These Wikipedias use language codes that do not conform to the [ISO 639](#) standard (which is how wiki subdomains are chosen nowadays).

1. [als](#): – originally used for the [Alsatian Wikipedia](#), which now encompasses the [Alemannic dialects](#) in general — the official code [gsw](#) (<https://iso639-3.sil.org/code/gsw>) is being considered as a replacement subdomain (note that [als](#) (<https://iso639-3.sil.org/code/als>) officially represents the unrelated language [Tosk Albanian](#))
2. [bat-smg](#): – invented code used for the [Samogitian Wikipedia](#) (not the official code [sgs](#) (<https://iso639-3.sil.org/code/sgs>))
3. [be-tarask](#): – invented code used for the [Belarusian \(Taraškievica\) Wikipedia](#), combination of [be](#) for [Belarusian](#) and IETF language tag [tarask](#) for [Taraškievica](#)
4. [bh](#): - deprecated code used for the [Bhojpuri Wikipedia](#) ([bh](#) is the deprecated ISO 639-1 code for the [Bihari languages](#), which [Bhojpuri](#) is a part of. The official code for [Bhojpuri](#) is [bho](#) (<https://iso639-3.sil.org/code/bho>))
5. [cbk-zam](#): – invented code used for the [Zamboanga Chavacano Wikipedia](#) (note that [cbk](#) (<https://iso639-3.sil.org/code/cbk>) is the correct code for the larger family of languages [Zamboanga Chavacano](#) is a member of)
6. [fiu-vro](#): – invented code used for the [Võro Wikipedia](#) (not the official code [vro](#) (<https://iso639-3.sil.org/code/vro>) — note that [fiu](#) (<https://iso639-3.sil.org/code/fiu>) is the official code for the family of languages [Võro](#) is a member of)
7. [ksh](#): – code used for the [Riparian Wikipedia](#), even though [ksh](#) (<https://iso639-3.sil.org/code/ksh>) actually represents [Kölsch](#) (or [Colognian](#)), a subset of [Riparian](#)
8. [map-bms](#): – invented code used for the [Banyumasan Wikipedia](#) (note that [map](#) (<https://iso639-3.sil.org/code/map>) does represent the family of languages the [Banyumasan dialect](#) falls within)
9. [nds-nl](#): – invented code used for [Dutch Low Saxon Wikipedia](#) would technically be the correct code for [Low Saxon](#) spoken in the [Netherlands](#) (i.e., [nds-NL](#)), but is therefore redundant with [nds](#); the code used for the [Low German/Low Saxon Wikipedia](#) (note that [nds](#) (<https://iso639-3.sil.org/code/nds>) is the correct code for the [Low German/Low Saxon family of languages](#), which [Dutch Low Saxon](#) is a member of)
10. [nrm](#): – code used for the [Norman Wikipedia](#) (not the official code [nrf](#) (<https://iso639-3.sil.org/code/nrf>) — note that [nrm](#) (<https://iso639-3.sil.org/code/nrm>) is the official code for the completely unrelated language [Narom](#))
11. [roa-rup](#): – invented code used for the [Aromanian Wikipedia](#) (not the official code [rup](#) (<https://iso639-3.sil.org/code/rup>) — note that [roa](#) (<https://iso639-3.sil.org/code/roa>) is the standard code for the larger family of [Romance languages](#) that [Aromanian](#) is a member of)
12. [roa-tara](#): – invented code used for the [Tarantino Wikipedia](#) (again, [roa](#) (<https://iso639-3.sil.org/code/roa>) is the standard code for the large family of [Romance languages](#) that the [Tarantino dialect](#) falls within)
13. [sh](#): – deprecated code used for the [Serbo-Croatian Wikipedia](#) (valid IETF language tag, but not the official code [hbs](#) (<https://iso639-3.sil.org/code/hbs>))
14. [simple](#): – invented code used for the [Simple English Wikipedia](#) (which is just an IETF language tag, not the formal code [en-simple](#))
15. [zh-classical](#): – invented code used for the [Classical Chinese Wikipedia](#) (not the official code [lzh](#) (<https://iso639-3.sil.org/code/lzh>))
16. [zh-min-nan](#): – invented code used for the [Southern Min Wikipedia](#) (not the official code [nan](#) (<https://iso639-3.sil.org/code/nan>))
17. [zh-yue](#): – invented code used for the [Cantonese Wikipedia](#) (not the official code [yue](#) (<https://iso639-3.sil.org/code/yue>))

Note that [renaming wiki subdomains](#) is [very difficult](#), which is why so many of these nonstandard codes are still in use despite the existence of alternatives.

Redirects

1. [be-x-old](#): – redirects to [be-tarask](#): (see above section)
2. [cz](#): – redirects to [cs](#): (the [Czech Wikipedia](#))
3. [dk](#): – redirects to [da](#): (the [Danish Wikipedia](#))
4. [gsw](#): – redirects to [als](#):, but [gsw.wikipedia.org](#) (<https://gsw.wikipedia.org>) points to [incubator:Wp/gsw](#)^[1]
5. [jp](#): – redirects to [ja](#): (the [Japanese Wikipedia](#))
6. [mo](#): – redirects to [ro](#): (as discussed above, the [Moldovan Wikipedia](#) now redirects to the [Romanian Wikipedia](#))
7. [nan](#): – redirects to [zh-min-nan](#): (the [Southern Min Wikipedia](#))
8. [nb](#): – redirects to [no](#): (the [Norwegian Wikipedia](#) using [Bokmål orthography](#))
9. [nrf](#): – is not recognized by mediawiki as of 2026-03-19, but [nrf.wikipedia.org](#) (<https://nrf.wikipedia.org>) redirects to [nrm](#): (the [Norman Wikipedia](#))^[2]
10. [yue](#): – redirects to [zh-yue](#): (the [Cantonese Wikipedia](#))

Non-language subdomains

- [nostalgia](#): (alias: [nost](#):) – A read-only snapshot of [English Wikipedia](#)'s early days.
- [sep11](#): – The [Sep11wiki](#) existed with a [.wikipedia.org](#) URL from 2001 to 2008, despite its totally different scope and purpose from all other Wikipedias. It was made read-only in 2006 and closed two years later.

- [ten](#): – Used for Wikipedia 10, the 10th anniversary of Wikipedia celebration events. (Since "[ten](#)" is an ISO language code for the extinct Tama language in Colombia, the interwiki prefix "[tenwiki](#):" is now used to refer to this site.)
