I've used many different Python apps claiming to be free and most of them were broken. This is the first app I've come across after testing multiple different apps that actually works without you paying

I could do more in the Notes app

quin (the cool)

I'm not trying to be rude, but unless you pay an absurdly high amount of money, this app is just a glorified text editor. Basically every single feature is locked behind a \$40-\$130 paywall. The main "feature"

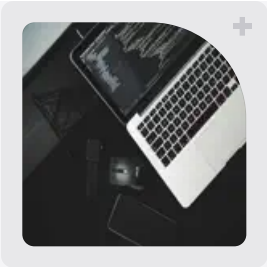

Finally One that works
