About us

As a peak body, the Zoo and Aquarium Association Australasia (ZAA) represents the collective voice of the zoos, aquariums, and sanctuaries in Australia and New Zealand. We operate to the highest standards. We are committed to the Five Domains model of animal welfare. Using the Five Domains model, ZAA and its members lead over 100 breeding programs in support of conservation and community education. Additionally, we actively contribute to threatened species recovery around the world. Together, our members enhance the role of individual zoos and aquariums in conserving wildlife. Each year, they connect 22 million visitors with nature, educate 1.1 million students about wildlife and contribute over \$20 million to conservation. As an association, we bring our members together, facilitating shared knowledge and continuous improvement in conservation, welfare, biosecurity, science, research, social and community programs. The Association is a

High Pathogenicity Avian Influenza (HPAI) has been detected in wild and domestic, across Australia. This is the first detection of H5N1 bird flu on the continent.

ZAA continues to remain vigilant and has deployed response teams, as well as working closely with state and territory health networks.

If you see a single or group of birds, please:

- Avoid contact and do not feed the birds
- Record the date, time and location
- Report it to the Emergency HPAI Response Team

Australia has been working to respond quickly to this H5 bird flu incursion.

This strain is NOT currently affecting wild bird movements.

For detailed HPAI information, and more resources, visit the ZAA Website <https://lnkd.in/ga5n9wTg>
