### Overview

## About us

Our story began in 1874, when we first supplied explosives to the Victorian goldfields in Australia. Since then, we have grown to become one of the world's leading mining and infrastructure solutions providers. From the production and supply of explosives, blasting systems, mining chemicals and geotechnical monitoring to our cutting-edge digital solutions and comprehensive range of services, we sustainably mobilise the earth's resources. With 150 years of expertise, our 14,000+ community of engineers, scientists, technologists, operators, business specialists and on-site crew support customers in surface and underground mines, quarry, construction, and oil and gas operations. Sustainability is integral to our operations. Our approach to sustainability begins with ensuring we operate our business responsibly, and by prioritising the safety of our people, customers, and

One of the most persistent challenges in the mining industry is the gap  
between what is drilled and what is ultimately charged and blasted.

Orica Digital Solutions' **Peter Leckie** explains that this is driven not by a lack of technology, but by  
shortcomings in information quality, availability, and timing.

Understanding the orebody has always been fundamental to mining - but how that knowledge is captured, connected, and applied is rapidly evolving.

In the latest edition of **Coring Magazine**, we explore how Orica Digital Solutions' **Axis Mining Technology** is helping bridge the gap between the drill site and the decisions that follow - connecting high-quality field measurements with downstream modelling, planning, and execution.

□ Read the full article to learn how we're helping transform orebody intelligence from core to cloud.

Open. Secure. Connected.

Orica Digital Solutions prides itself in providing an open secure and connected platform to our customers and ecosystem partners in the industry.

We're excited to announce that **3vGeomatics** has achieved ISO/IEC 27001:2022 certification. This follows our Blast Design and Execution industry-leading technologies on cloud-native platform.

🔒 Safeguarding sensitive business data is non-negotiable in today's dynamic digital environment.

This certification signifies our unwavering commitment to maintaining the highest standards in information security management. Our solutions don't just meet industry benchmarks; they exceed them.

As we continue to support infrastructure owners, operators and engineering teams with satellite-based ground deformation monitoring and geotechnical risk intelligence, maintaining secure and resilient systems remains fundamental to the value we deliver for our customers.
