

Redefining **work** in the AI era

We're building productive and connected work experiences across Google's ecosystem of platforms and devices.

Connected experiences, with AI at the core

Securely unleash AI across every device, app, and platform your teams use. Google's enterprise platforms enable seamless employee productivity while unlocking powerful new business capabilities.

Smart, connected and secure experiences for your enterprise

Google's enterprise platforms and devices allow IT to empower employees to work smarter and be more productive, across a connected surface of platforms, devices and apps, with the Google-backed security they need.

Contextual AI to work smarter

Gemini is available right in-the-moment, with contextual relevance, to meet users within their workday so they can work smarter and be more productive.

The widest set of work surfaces

Users can work seamlessly across devices, endpoints, and new work surfaces using adaptive AI-powered interactions, so they can pick up where they left off.

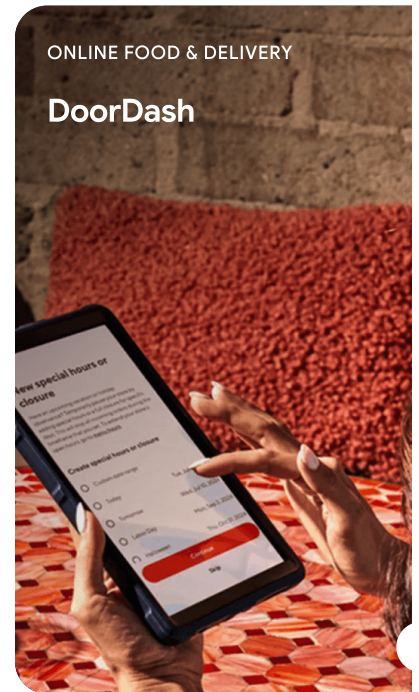

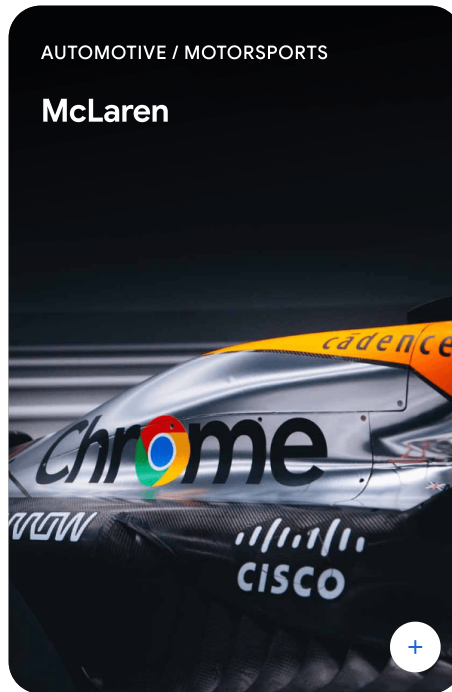

Google-backed security

Google's security expertise is built into each product to enable a Zero Trust, defense-in-depth approach, along with AI-assisted management for total peace of mind.

The future of enterprise work, powered by Google

Companies around the world are building their foundational enterprise tech stack with platforms and devices from Google.

Connected and AI-powered work experiences with Google

AI-powered work is here. Discover how Google's platforms and devices deliver productive AI experiences, consistently across the widest set of devices, while giving essential control for IT and security teams.
