RELATED RESOURCES

Disaster financial preparedness: It's about mitigating risk and doing the right thing

Perhaps you've followed the news or even experienced the extreme heat, wildfires, tornadoes or hurricanes this summer. These types of disasters occur every year and are becoming more frequent and more costly.

Not if but when: Prepare now for the next disaster

Perhaps you've been following the outbreaks of extreme heat, wildfires, tornadoes, and hurricanes this summer. Extreme weather affects households and communities across the country. Whether someone recovers and the speed of recovery depends on how well they've prepared before the disaster. Financial preparation is an important element of that.
