Join us on 5–6 August in Bengaluru as the flexographic printing and packaging community comes together to exchange ideas, explore emerging innovations, and discuss what's next for the industry at the **Flexo Summit Asia 2026**!

Representing Flint Group Packaging Solutions, a gold sponsor of the event will be **Dhara Jaiswal** and **Deenal Shah**, who look forward to connecting with customers, partners, and industry peers throughout the summit.

If you're attending, be sure to stop by and say hello. We look forward to meaningful conversations about the future of flexographic printing and packaging.

Short runs, evolving regulations, and sustainability targets are redefining how packaging is produced, especially in short-run flexible packaging applications.

Flexocure® LEAP was developed to support this shift across both labels and flexible packaging applications.

A solventless, 100% solids UV flexo system that provides numerous benefits:

- Reduced waste and emissions, as no solvents evaporate during printing and all applied ink remains on the substrate
- Improved migration safety, supported by a specially designed resin system

- Reliable performance across substrates

A solution designed not just for today's requirements - but for what comes next.

Corrugated packaging
environmental impact

As regulations tighten

component has a role to play in supporting circularity and reducing environmental impact.

Our latest Whitepaper, "Material Issues: Improving Sustainability in Corrugated Packaging," explores how material choices, inks and coatings can help unlock measurable sustainability gains across the entire packaging system.

Download the Whitepaper today and discover practical strategies to stay compliant, competitive and sustainable: <https://lnkd.in/dx7zg6w>

A big thank you to **Flint Group Packaging Solutions** for hosting another successful FIRST Live Press Operator Certification training! Special thank you to **Scott Shutt** Shutt and **R. Keith Nagle** for their help.

We're grateful to **Flint Group Packaging Solutions** for opening its doors and to all the press operators and industry professionals who participated in this hands-on learning experience.

Together, we're helping strengthen technical knowledge, share best practices, and invest in the future of flexography.

Interested in bringing FIRST Live to your facility? Hosting a FIRST Live event is a great way to provide hands-on training for your team while supporting industry-wide education. Reach out to **Kenny Tucker** at ktucker@flexography.org to learn more about hosting an upcoming session.

Join our next FIRST Live August 11-13 at BW Converting Packaging Innovation Center in Green Bay, WI: <https://lnkd.in/ecmjFHN7>

With more than 30 years of expertise and an annual production capacity exceeding 20,000 tonnes of resins, our Caronno, Italy, facility enables us to manufacture essential resin intermediates for our nitrocellulose (NC)-free ink technologies.

These resins support our NC free-based VertixCode flexographic and MatrixCode gravure ink solutions, helping converters achieve high-performance print results while supporting packaging designs that are compatible with evolving recycling requirements.

By combining in-house resin production with deep formulation expertise, we provide customers with reliable access to innovative NC-free ink solutions designed for the demands of modern packaging.
