Hyundai MOBIS special
in the world. Based on deep expertise in manufacturing core-modules for automobiles and A/S parts
distribution, we now concentrate on developing software and system solutions for future mobility.
Key focusing areas include electrification, autonomous driving and connectivity technology. We
create Innovation for Humanity and Mobility for Tomorrow. The One For All Mobility.

[GBA 2nd Cohort - Report

How can corporate success go hand in hand with supporting the community:

At MOBIS Plymouth, making a real difference starts with rolling up our sleeves. Established by the HR team, the Mobis C.A.R.E. Committee is powered by passionate employees who are dedicated to making a meaningful difference across the Detroit area.

From organizing winter clothing and Thanksgiving food drives to crafting heartfelt cards for the Ronald McDonald House and making dog toys for local animal shelters, every effort is focused on spreading warmth and compassion.

Our GBA, **Samrat Vittal**, shares how these simple yet powerful acts of kindness are helping build a more supportive and compassionate community.

Snack Digest #3 #PE_System

Hyundai MOBIS is moving toward a new generation EV mobility.

The advanced PE (Power Electronics) system consolidates the motor, inverter, and reducer into a single unit to deliver power.

This architecture serves as a compact structure without compromise.

- ✓ Ready for Every Car: Adaptable from compact city cars to high-performance SUVs
- ✓ Smaller but Stronger: Boosts torque by 16% and shrinks system volume by 20%, opening up new possibilities for the future of mobility.

Hyundai MOBIS continues to lead the way in EV technology.

More innovations to come.
