

Interface ToolchainsWriter

All Known Implementing Classes:

[DefaultToolchainsWriter](#)

public interface **ToolchainsWriter**

Handles serialization of toolchains into some kind of textual format like XML.

Author:

Mike Mol, Martin Kanter

Method Summary

All Methods

Instance Methods

Abstract Methods

Modifier and Type	Method	Description
void	write (Writer output, Map < String , Object > options, PersistedToolchains toolchains)	Writes the supplied toolchains to the specified character writer.

Method Details

write

```
void write(Writer output,
          Map<String,Object> options,
          PersistedToolchains toolchains)
    throws IOException
```

Writes the supplied toolchains to the specified character writer. The writer will be automatically closed before the method returns.

Parameters:

- output - The writer to serialize the toolchains to, must not be null.
- options - The options to use for serialization, may be null to use the default values.
- toolchains - The toolchains to serialize, must not be null.

Throws:

[IOException](#) - If the toolchains could not be serialized.
