Password Alert: Protect  
yourself from password theft

Increasingly, more students target journalists and news organizations, and the Solutions found that 52% of news media companies were hacked or suffered a data breach -- and the most common type of attacks were phishing (59%).

In 2016, a wave of cyberattacks in the U.S. that breached high-profile targets including the Democratic National Committee, Colin Powell and Olympic gymnast Simone Biles, underscored the need for enhanced security.

Password Alert

for more details, please refer to the link in the email. One of the most common ways to find typos, it looks to see if you enter your Google account password any place other than your account sign-in page.

If it detects that you've mistakenly entered your password on the wrong site, it immediately alerts you and prompts you to change it. If you're positive that you're on a
