org.apache.openjpa.lib.util

Class Localizer.Message

[java.lang.Object](#)

└─ org.apache.openjpa.lib.util.Localizer.Message

Enclosing class:

[Localizer](#)

public static class **Localizer.Message**
extends [Object](#)

A Message can provide a localized message via the [getMessage\(\)](#) method call, and can also provide the original key, package, and substitution array that were used to assemble the message.

Method Summary

String	getKey() The unique key for the localized message.
String	getMessage() The localized message.
String	getPackageName()
Object[]	getSubstitutions() Substitutions inserted into the message.
String	toString()
