Karl Freiburghaus (Karlitto Freigante)

February 26, 2025

This app keeps getting better & better all the time, better & easier to generate projects with than the desktop pro version. However, please include an undo option with the app as it is too easy to accidentally drag features to new locations while in edit mode. Also, the app needs an offline mode as it doesn't work when

I just downloaded this app for the first time and I love it. But, it does crash, maybe every 5 minutes. Usually when I reopen it it's where I was before it crashed. No, I'm not clearing the cashe and force stopping, I've had the app all of a half hour, I barely have a cashe. I see I should be able to drop pins and name them? Can't do that. But I'll keep it in hopes that Google fixes these issues.

Disappointed lately, even moreso with the version on my new device, installed in Sept 2023, it's full of glitches! For example it says "App Not Installed", yet it is, so I have to go to the APP store, look up Google Earth, and open App thru the app store, rather than through the icon (like it should). Hoping some other things go back to normal or get better. It's still EXTREMELY helpful and informative, and fun to use.
