

Your Storefront Shouldn't Tax Your Live Events.

Beacons gives you a great looking link-in-bio page. It even lets you sell some digital products. But the moment you want to run a serious, high-ticket live event, you hit a wall.

You're back to duct-taping systems together. You're selling the ticket on Beacons, but you're still relying on Zoom or Google Meet to actually host the session. You're still manually chasing down recordings and trying to figure out how to gate the replay.

And if you want advanced features? Get ready for the monthly subscription fees.

You need a platform where the storefront, the checkout, and the actual live delivery room are one seamless machine.

Enter Popup.

Popup vs. Beacons: The Creator's Growth Engine

Live Room Integration

Custom built-in live streaming room with one-time secure links.

Relies on third-party links (Zoom/Meet).

In-Event Conversions

Trigger high-ticket upsells live on screen during the event.

No live broadcasting capability.

Recording & Replays

Auto-records and instantly distributes to buyers.

Manual upload and distribution required.

Cost Structure

No monthly fees. We only win when you win.

Monthly fees for premium store tools.

Why They Make the Switch

"Beacons was fine for selling a \$10 ebook, but when I started hosting \$500 masterclasses, I needed a real platform that handled the actual live streaming and secure access. Popup was the obvious choice."

David, E-commerce Expert

Upgrade Your Event Delivery.

Stop hacking a basic storefront to do a premium event platform's job. Give your buyers the seamless, secure live experience they deserve.

Create your Popup page

No credit card required. No subscription. Pay only when you get paid.
