

WordPress User Profile Shortcodes

Last Updated on July 16, 2025

[Documentation](#) > [Shortcodes & Widgets](#) > [WordPress User Profile Shortcodes](#)

Last Updated on July 16, 2025

If you want to use the [shortcode builder](#) to create a [frontend user profile](#), or display the profile information of logged-in users anywhere on your site, below are shortcodes available to you.

Table of Contents

1 [profile-username]

2 [profile-email]

3 [profile-website]

4 [profile-nickname]

5 [profile-display-name]

6 [profile-first-name]

7 [profile-last-name]

8 [profile-bio]

9 [avatar]

10 [profile-avatar-url]

11 [profile-cover-image]

12 [profile-post-count]

13 [profile-comment-count]

14 [profile-author-post-count]

15 [profile-date-registered]

16 [profile-cpf]

17 [profile-file]

18 [profile-post-list]

19 [profile-comment-list]

20 [profile-hide-empty-username]

[profile-username]

Displays the username of users.

[profile-email]

Displays the email address of users.

[profile-website]

Displays the website URL of users.

[profile-nickname]

Displays the nickname of users.

[profile-display-name]

Displays the display-name of users.

[profile-first-name]

Displays the first-name of users.

[profile-last-name]

Displays the last-name of users.

[profile-bio]

Displays the biography of users.

[avatar]

Displays the user profile picture or avatar. [Learn more.](#)

[profile-avatar-url]

Displays the profile picture or avatar of users.

Below are supported shortcode attributes.

Attribute	Description
size	profile picture image size

[profile-cover-image-url]

Displays the profile cover-image URL of users.

[profile-post-count]

Displays the number of published posts by users.

[profile-comment-count]

Displays the number of comments written by users.

[profile-author-posts-url]

Displays the author page URL of users.

[profile-date-registered]

Displays the registration date of users.

[profile-cpf]

Displays the [custom-field](#)'s data of users.

E.g. If you have a gender custom field where the key is "gender" the shortcode will be

[profile-cpf key="gender"]

Below are supported shortcode attributes.

Attribute	Description
key	Field key of the custom field.
default	Text to display when custom field data is empty or not found.

[profile-file]

Displays a link to download/view [file custom-field](#)'s uploads.

Below are supported shortcode attributes.

Attribute	Description
key	Field key of the file custom-field.
raw	Accepts either <code>true</code> or <code>false</code> . if true, the URL of the uploaded file is returned.

[profile-post-list]

Displays a list of posts published by users.

Attribute	Description
limit	The number of posts to display.

[profile-comment-list]

Displays a list of comments written by users.

Attribute	Description
limit	The number of comments to display.

[profile-hide-empty-data]

An enclosing shortcode useful for only display profile data only if the data exist or isn't empty.

Say you want to only display users biographies only when they have one written, here's how to do it.

```
[profile-hide-empty-data field="bio"]  
Your Bio: [profile-bio]  
[/profile-hide-empty-data]
```

Note: nothing will be shown if the bio is empty. If you want to display a message such as "No bio found", add **default** attribute to the shortcode like so.

```
[profile-hide-empty-data field="bio" default="No bio found"]  
Your Bio: [profile-bio]  
[/profile-hide-empty-data]
```

Below are supported shortcode attributes.

Attribute	Description
field	Accepts <code>username</code> , <code>email</code> , <code>website</code> , <code>nickname</code> , <code>display_name</code> , <code>first_name</code> , <code>last_name</code> , <code>bio</code> . It also accepts a custom-field's key .
default	Text to show if profile data is empty or not found.
