Spring Authorization Server moving to Spring Security 7.0

ENGINEERING | JOE GRANDJA | SEPTEMBER 11, 2025 | 1 MIN READ | 0 COMMENTS

[Spring Authorization Server](#) has come a long way since [1.0](#) was officially released in November 2022. Starting as a project separate from [Spring Security](#), has allowed it to iterate quickly on feature development and ultimately grow a rich feature set for building OAuth2 Authorization Servers.

It has reached that point of maturity and stability and we believe the time is now to move it to [Spring Security 7.0](#).

The main benefit this will provide our users is a streamlined developer experience. Whether you are working with OAuth2 Client or OAuth2 Authorization Server, you won't need to switch between projects any longer as the source, javadoc and [reference documentation](#) will live in Spring Security. Furthermore, issues and

changes that we're confident will be a straightforward migration update.

We hope you're excited as we are as we prepare to move Spring Authorization Server to Spring Security [7.0](#).
