Description

WP User Activity is the best way to log activity in WordPress. Activity can be sorted, filtered, and viewed per-user, along with session data for logged in users and IP addresses & user-agents for others.

Activity is broken down into object “Types” and “Actions.” Types are the objects being acted upon, and actions are what is being done to them. If you’re familiar with BuddyPress, this should feel pretty comfortable.

Examples

Admin logged in 2 minutes ago.

Admin created the post "Hello World" 33 seconds ago.

Admin created the topic "I need help!" 5 days ago.

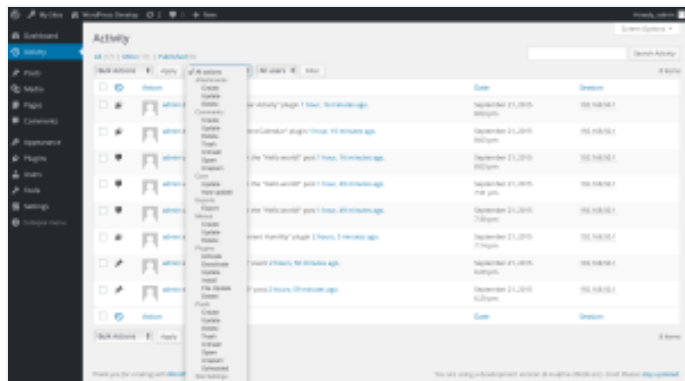

Available Actions

- Attachments (Upload, Edit, Delete)
- Comments (Create, Pending, Approve, Unapprove, Trash, Untrash, Spam, Unspam, Delete)
