Description

Conecshon Topic Prefixes for bbPress is a lightweight plugin that adds a simple and flexible prefix system to bbPress forums.

Users can select a prefix when creating or editing topics, and the selected prefix is displayed as a styled badge alongside the topic title in forum listings.

Example prefixes include:

- Review
- Recommendation
- Warning
- Question

Features:

- Add selectable prefixes to bbPress topic forms
- Display prefixes as badges in forum topic listings

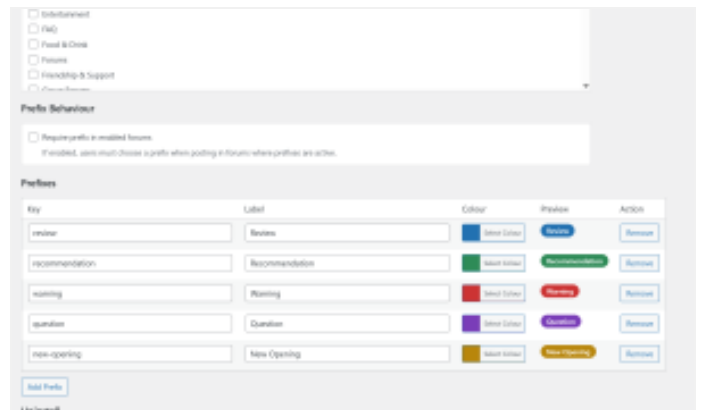

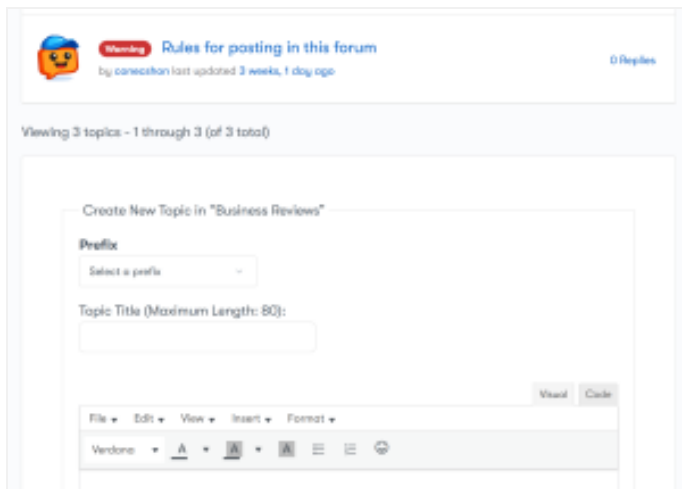

- Prefixes stored as topic meta
- Simple admin page to manage prefixes and colours
- WordPress colour picker support
- Choose which bbPress forums use prefixes
- Optional setting to require a prefix in selected forums
- Reset to defaults option
- Optional setting to delete all plugin data on uninstall
- Lightweight and fast with no external dependencies

Notes:

- Prefixes apply to topics only
- Prefixes do not apply to replies
- If no forums are selected, prefixes are active in all forums
- Plugin settings are removed when the plugin is deleted
- Topic prefix meta can also be deleted if full cleanup is enabled
- bbPress must be active for this plugin to function

This plugin is a third-party add-on and is not affiliated with or endorsed by the bbPress project.
