An exciting update on diff and merge performance

Back in July I published Encountering some turbulence on Bitbucket's journey to a new platform, sharing with the public for the first time that Bitbucket Cloud is in the final stages of a migration from our data center onto Atlassian's cloud platform—the same...

It's official! Announcing Runners in Bitbucket Pipelines

You've always been able to execute CI/CD workflows via Bitbucket Pipelines using Atlassian's infrastructure. This is the easiest way to use Bitbucket Pipelines because you don't need to host or manage any servers. We host it and manage it for you. But...

Two-step verification

Setting up two-step verification is easy, just follow the steps below.

- 1 **Download a two-step verification app**
 - 🍏 iPhone, iPod Touch, or iPad: [Authy for iOS](#)
 - 🤖 Android devices: [Authy for Android](#)
 - 🪟 Windows devices: [Microsoft Authenticator](#)

- 2 **Scan this QR code with your verification app**

- 3 **Enter the resulting verification code**

Can't find your code? [Get help.](#)

Changes to Bitbucket Pipelines due to crypto mining abuse

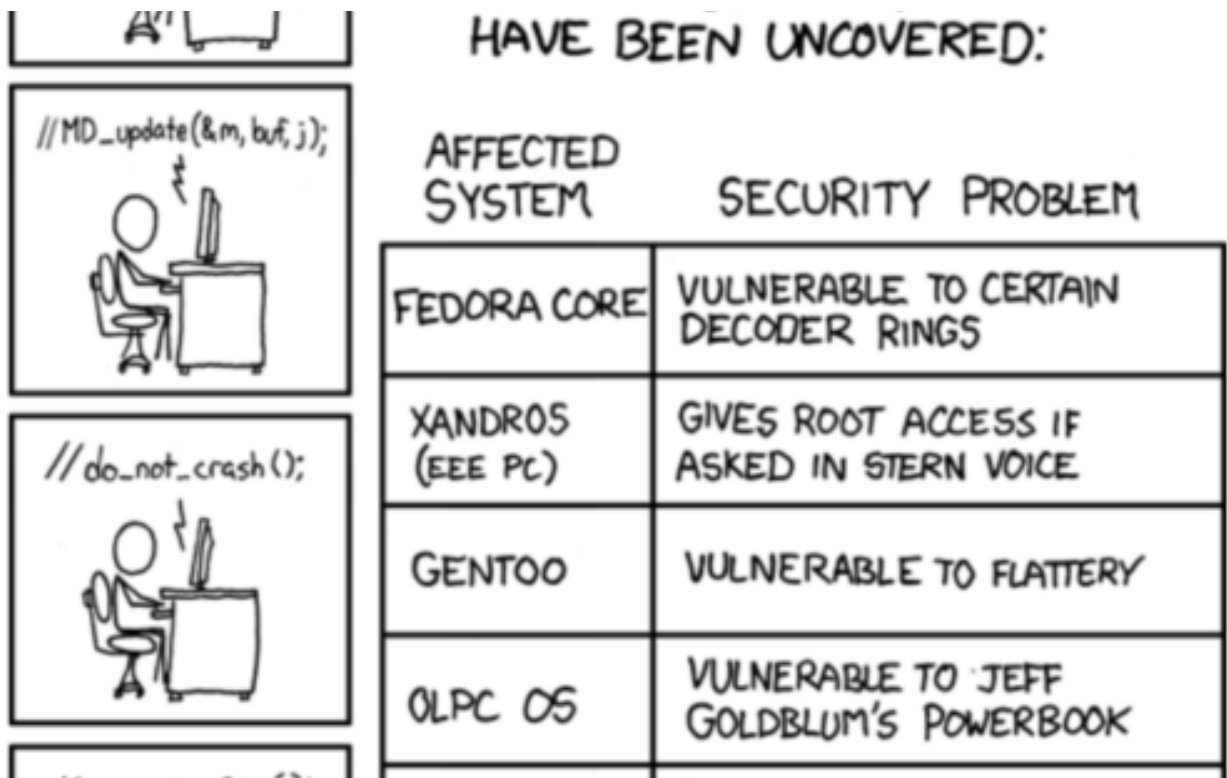

Over the last months, Bitbucket Pipelines has experienced a massive increase in abuse from bad actors taking advantage of the free minutes to mine cryptocurrencies. This has had a big impact on our CI/CD platform requiring our team to stay on top of this...

Encountering some turbulence on Bitbucket's journey to a new platform

The past week has been a turbulent time for Bitbucket Cloud's engineering and support teams as well as our customers. Some of you have expressed concern regarding our services' performance and reliability in recent days. Fortunately, for the...

Deprecating Atlassian account password for Git and Bitbucket API activity

Starting Mar 1, 2022, Bitbucket users will no longer be able to use their Atlassian account password to interact with Bitbucket via Git over https and the Bitbucket API. Users will need to start using Bitbucket app passwords for Git commands, scripts, an...

What DevOps means to devs

It used to be simple: write code, test it locally, deploy to prod, everything runs perfectly forever. Right? Wrong! Software development is messy, and growing more complex every day. Doing DevOps isn't just committing code once it has passed a prescribed...

application *VERIFYING, UNLOCKED*

Latest deploy: Žiga Vidic 7hr 52m elapsed
#2785 SD-2729 – graphs with mocked data

Drift: PRODUCTION ⇌ STAGING

No drift detected, everything is in sync.

Frequency: 7 deploys per day

documentation *UNLOCKED*

Latest deploy: Dylan Etkin 1d 1hr 3m elapsed
21e4dd0 GitBook: [master] 2 pages and 9 assets modified

Drift: PRODUCTION ⇌ STAGING

No drift detected, everything is in sync.

Frequency: 0.6 deploys per day

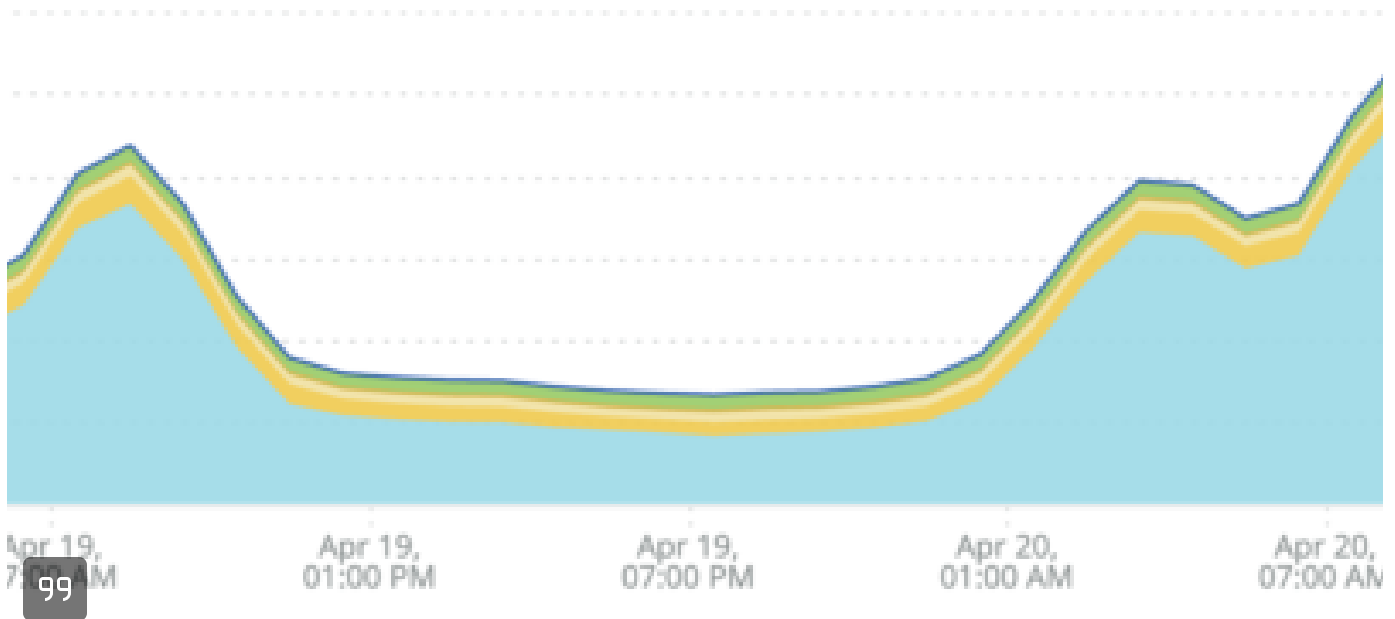

DEPLOYMENT LOCKING

How Statuspage deploys continuously with Bitbucket and Sleuth

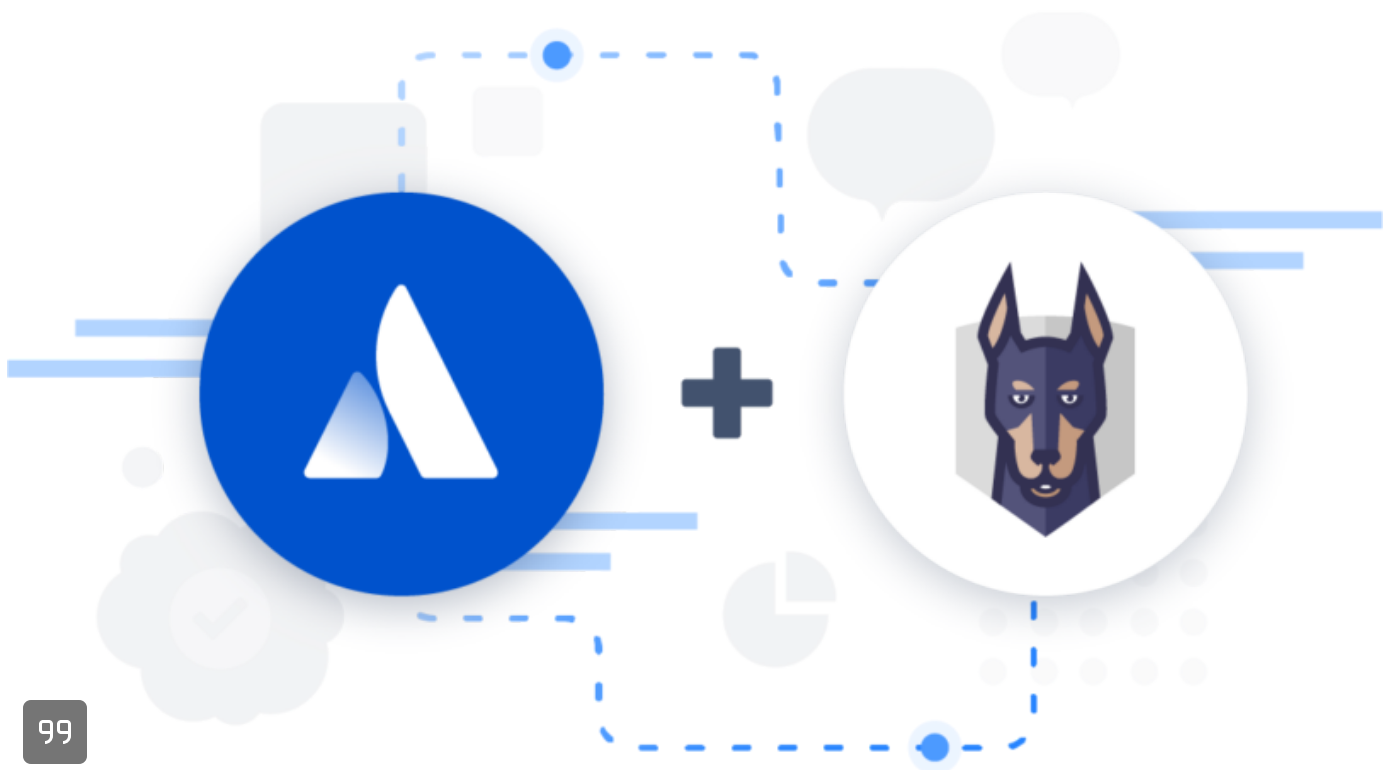

This post was written by Michael Knighten, Founder & COO of Sleuth What it takes to deploy continuously There are some similarities between deploying continuously and driving in the fast lane. When driving, you need to be always on the alert, proactively...

Extinguishing our performance fires and rebuilding for the future

I stepped into the role of Head of Engineering for Bitbucket Cloud in late 2020, having served as one of the team's senior engineering managers for several years. It is an honor and a privilege to lead this team, and I couldn't be prouder of the hard work...

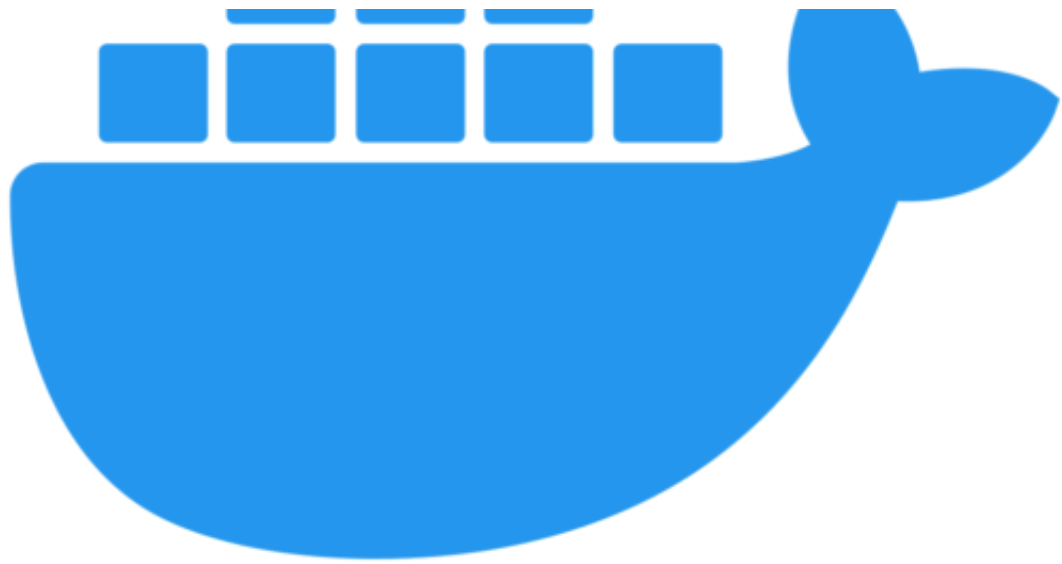

Integrate security into development with Snyk, now a seamless part of Bitbucket Cloud

Even small vulnerabilities can cost a team a lot. All too frequently we see news reports of organisations that mishandled their code & build level security, causing customer data to be exposed. The high publicity of these mistakes proves that securit...

Editing Pull Requests just got a little easier

Bitbucket Cloud's code review experience is highlighted by the pull request view – a central place to view and discuss proposed changes, create actionable tasks from discussion, and reach a consensus on the changes making their way to your codebas...

Skipping artifact downloads in Bitbucket Pipelines

Allowing pipelines steps to skip downloading artifacts has been a highly requested feature from our customers. You can now disable artifact downloading on certain steps that do not require any artifacts, which will allow faster builds and can reduce...

Automate (and scale) your Android deployment with Bitbucket Pipelines

We've launched a new Android template in Bitbucket Pipelines. This template helps you automate building and testing an Android project in a Docker container, using Gradle as your build tool. Access the template code [here](#) or go to the Pipelines tab of...

Bitbucket Pipelines and OpenID Connect: No more secret management

Bitbucket Pipelines now allows you to talk to your favorite third-party applications without an access token or secret. You no longer need to store your secrets in Bitbucket Pipelines. You can generate an OpenID Connect token in Bitbucket Pipelines...

Introducing a New Pull Request Sidebar

Bitbucket Cloud's pull request sidebar is useful because it displays all the relevant details of the pull request you're looking at. However, with so much information present, it can be hard to find the information you need. To address feedback we've...
