In an era with global economy marked by trade barriers, energy uncertainty and supply-chain disruptions, resilience matters as much as efficiency.

In Global Lens, a China Daily's column highlights global thinker's views, Bakhtizin Albert, director of the Central Economics and Mathematics Institute of the Russian Academy of Sciences, said closer technological and industrial cooperation between China and Russia could help create an independent scientific, technological and industrial center for sustainable development. Check out the video to find out more.
