★★★★★ July 14, 2026

One of my favorite apps for my brainmaps....on desktop. I periodically check the app store to see if there are any updates for the mobile version. If the mobile version can reach beyond just the read-only version and enables me to edit the pages on my phone, this will be one of the greatest apps I've used and I will gladly invest.

It's a good start, but there are problems with sizing and formatting that are hard to ignore. Also, apparently you can't select a frame within a frame, which is ideally how I'd like to use this app. My main frames in Figma include phone bezels, but I want to select just the content frames to send to my phone, and that doesn't work.
